

The ingredients in **HOOK** provide a combined effect of wetting, sticking, spreading and penetration of fungicide, insecticide, herbicide or defoliants.

As a general rule, adjuvants are applied to the tank mix; however, since **HOOK** is self-emulsifiable it can also be incorporated in herbicide or insecticide emulsifiable concentrates for use in low-volume formulations.

HOOK is a multipurpose adjuvant that has non-ionic surfactants that make it compatible with most of today's chemicals.

HOOK's surfactant action helps to keep the solution in suspension, reduces surface tension, giving spray an even coverage.

HOOK cuts leaf wax and increases the penetrations of spray.

HOOK reduces foam, controls drift of spray solutions, helps stick spray solutions to the target.

HOOK helps place spray on target, creates uniform droplets for more efficient coverage.

This results in

Greater desposition for efficient control.

- Controls drift of spray solutions
- Helps stick spray solutions to the target

NOTICE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use but neither this warranty nor any other warrant of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to Seller And Buyer assumes the risk of any such use.

**NON-IONIC SPREADER/STICKER
SURFACTANT/ADJUVANT FOR
INSECTICIDE, FUNGICIDE, HERBICIDE**

PRINCIPAL FUNCTIONING AGENTS:

Alkyl Polyoxyethylene ethers, polymerized resins and fatty acids	17.6%
Inert ingredients	82.4%
TOTAL	100.0%

MIXING INSTRUCTIONS

Add **HOOK** to the spray tank with good agitation, **after** all the other spray materials have been added.

“ADD HOOK LAST”

DIRECTIONS FOR USE - DOSAGE PER 100 GALLONS SPRAY MIX

Defoliants and Desiccants	1 - 4 pints	Insecticides	4 - 32 ounces
Fungicides and Acaricides	4 - 32 ounces	Wettable Powders	8 - 48 ounces
Herbicides	1 - 4 pints		

Concentrated Sprays: Use 4 to 32 fluid ounces per acre on field crops such as cotton, foliage, grain, and row crops

DRIFT CONTROL: Use at least 1 quart per 100 gallons spray mix as needed.

These directions for use do not constitute a recommendation to use any toxicant in any manner contrary to contrary to the directions of the manufacturer.

NOTE: The above use recommendations are considered to be adequate for most uses. Some pesticides, however may require higher rates for optimum effect. Follow pesticide label directions when this occurs.

GENERAL INFORMATION

HOOK is a self-emulsifiable spreader, surfactant adjuvant designed to improved the efficiency of herbicide, insecticide, and fungicide sprays by increasing contact activity, penetration and adhesion to plant surfaces.

NET CONTENTS 2-1/2 GALLONS

CAUTION
Keep out of reach of children
Do not get on eyes, skin, or clothing

STATEMENT OF PRACTICAL TREATMENT

If this product gets into the eyes, immediately wash the eyes with large amounts of water for at least fifteen minutes. Seek medical treatment immediately. If this product gets on the skin, immediately wash the contaminated area. Seek medical attention if skin irritation persists. If this product has been swallowed and the person is conscious, immediately give large volumes of water. Do not induce vomiting. Seek medical treatment immediately.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Follow all governmental procedures for the disposal of pesticide spray solutions. Triple rinse container; empty rinsate into spray tank. Dispose of empty container according to approved local practices; contact county agricultural commissioner for disposal information.
